

GLOBAL-PAK & Green Initiatives

Global-Pak strives to be an eco-friendly company by reducing our waste and decreasing our carbon footprint.

How do we do it?

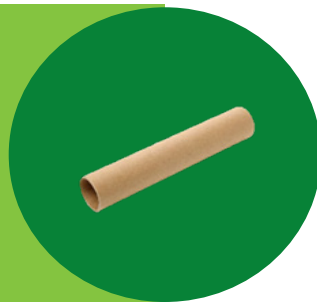

All plastic and cardboard material that can't be reused is sent to a recycling company

Any miscellaneous packaging containers from food & drinks are recycled

Liner cores are reused as support in liner boxes & shared with partners who can reuse them at their businesses

Unused paper is put into Shred-It Bins & recycled

We're no longer using Styrofoam cups or plastic silverware & encourage use of refillable water bottles and cups
